

Agriculture

Nature Protection

Threat to existence

- Closing of farm
- *Ensure sufficient compensation*

Loss of subsidies (riparian land)

- give up (part of) acreage
- *Enable extensive animal husbandry*

Land swapping

- swop leads to improved cultivation efficiency

Increase of parasites

- lakes/ puddles
- *Adopted management of animals and grazing land*

Increase of mosquitos

- lakes/ puddles
- *Fosters predator (birds, bats)*
- *Decrease source of infections*
- *Monitoring*

Litter Noise

- increased use with cars, barbecue, fire, angling
- *Controlling / communication*
- *Clarify competences for control*

Maintenance (land)

- *By landowner / tenant (i.e. Naturschutzstiftung)*

Municipality

Risk of erosion

- for bank erosion
- dynamic development

Additional source of income

- enable use of Vecht river for tourism
- more landing places for Zompen
- create long-term perspective

Compulsion to change

- *Create Incentives for alternatives*

Loss of acreage

- alluvial forest with increased flooding within the floodplain area
- Increased touristic use of externals
- damage by feeding birds
- *open areas for extensive animal husbandry (1GE/ha)*
- *Compensation of external damage*

Increased attractiveness (recreation)

- more infrastructure in Laar
- options for shopping, biking (controlled by market conditions)

Environmental Education

- access for schooling classes

Increased attractiveness for living

- not opening all of the area for tourists
- improved aesthetic value

Erosion control

- natural development of river bed

Showcase

- marketing
- symbolic value

Decreased agric. immissions

- extensive animal husbandry
- more buffer zones

Ecological upgrading

- rest areas with spatial and time zoning for min. disturbance by boats, humans
- Increased dynamic / natural development
- Open areas for bird resting places

More biodiversity

- restrictions of use
- display of what deserves protection improves protection
- Monitoring necessary: indicators: curlew

Restrictions for use (legal)

- high level of protection
- forbidden access

Nature-Tourism

- controlled: viewing not too close
- Visibility of attractions from trails

Water logging of trails / paths

- trails close to the Vecht river
- Natural development of river bed

Increased attractiveness (tourism)

- Access at least partly for tourists
- Use of boots
- Expansion German Tourism-Infrastructure
- Visibility of attractions

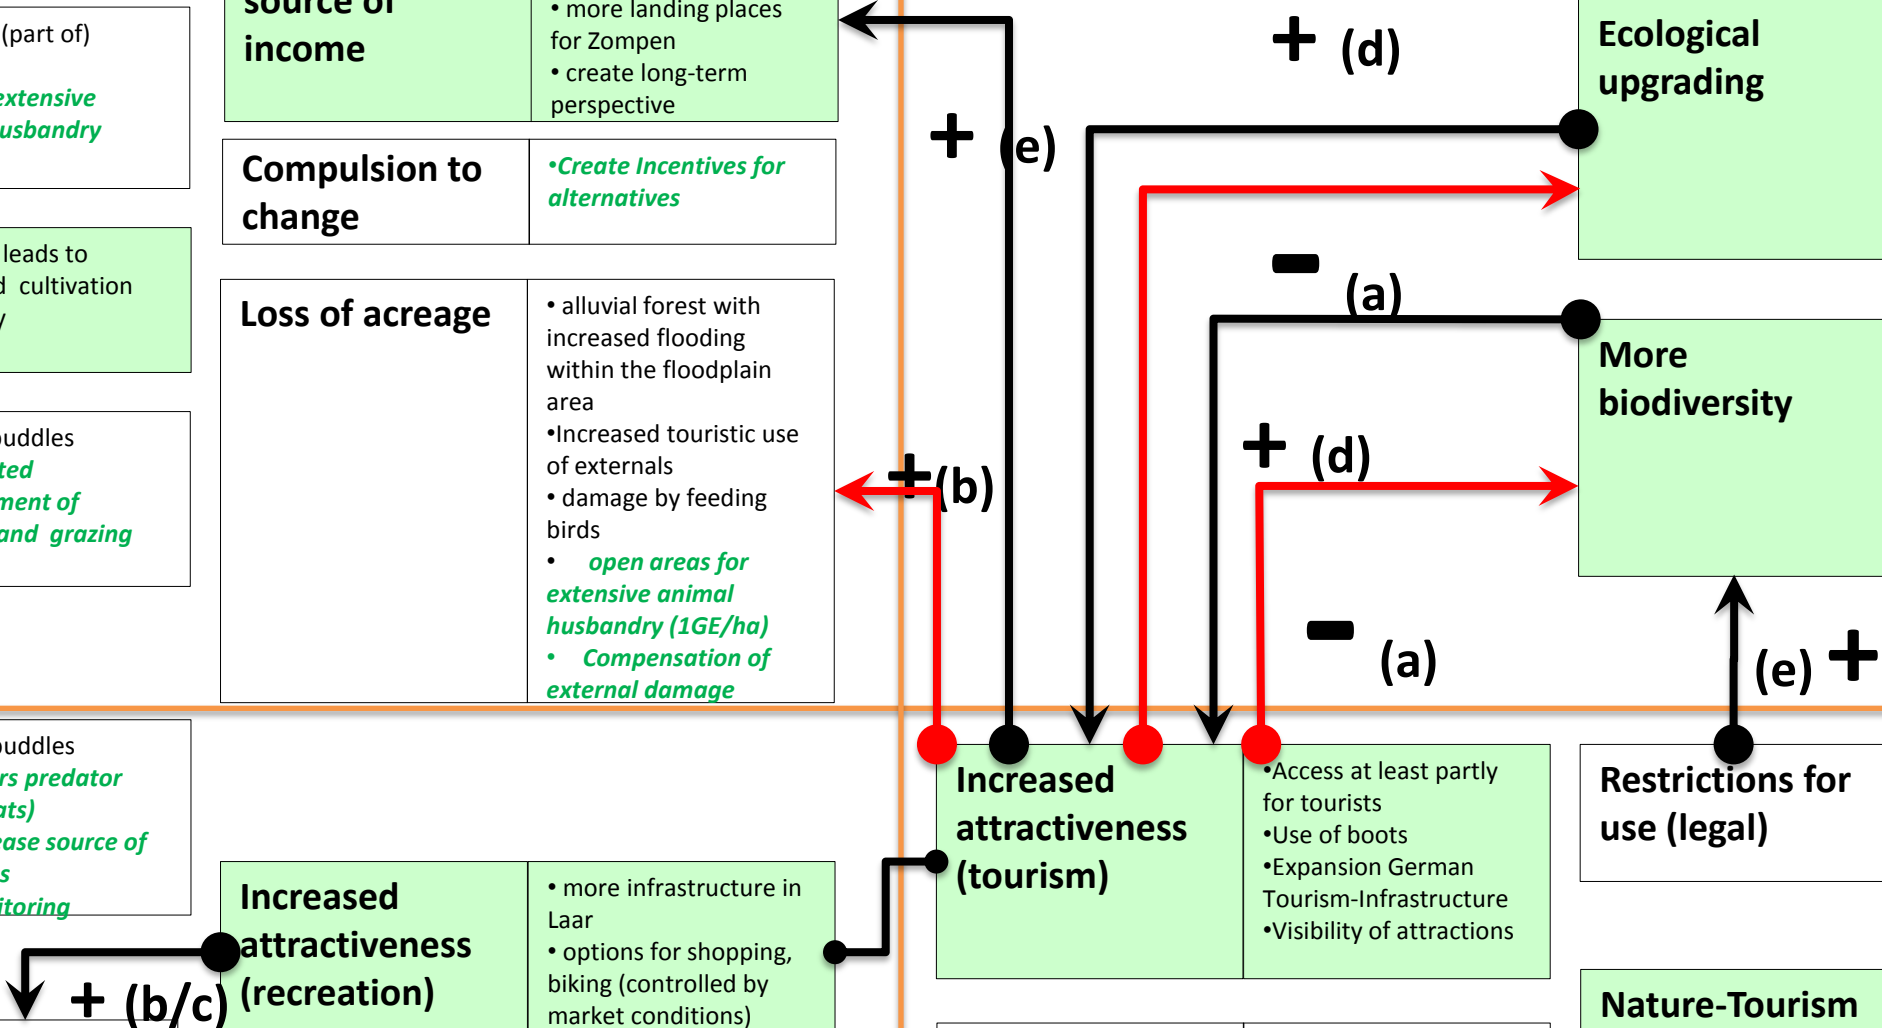

Constraints for boating

- draught / sedimentation
- water plants

Zompen

- Special permit (use of motorized boat)
- Minimized disturbance: Störung minimiert: size, speed, travel schedule
- Expansion German touristic infrastructure

Tourism

Legend Diagram: Boxes: cost = white; benefit= green; stakeholder groups = grey; violett: central local project in interplay with measure. **Right areas of boxes:** framing conditions of costs and benefits, green text: for optimizing the measure. **Arrows:** dependencies (+= the more... the more; -= the more ... the less); indices: a) In case of high usages, for trails close to the Vecht river; b) In case of high usages, more litter, more wilderness camping; c) in case of unrestricted use, lack of control; d) More birds increase the attractiveness; e) Stay aware of longterm developments
